THE LABORATORY

Laboratory is the biggest area of Centro Tessile Cotoniero e Abbigliamento S.p.A. and the fulcrum of all technical activities of service and research.

The laboratory is registered on the Album of the highly qualified External Public and Private Laboratories, Law n.46 of 1982, and is authorized to carry out research on behalf of small and medium enterprises.

As a consequence of the high diversification of textile and clothing sector in Italy, test services which were initially the classic technological chemical and dyeing tests, have now been enlarged also to more technical and specialistic sectors. After ecological and protection sector also the Microbiological Textile Laboratory, the Comfort Laboratory, the Laboratory for evaluation of chemical risk, of protection against electromagnetic waves and for measurement of static electricity have been created.

The laboratory is accredited by ACCREDIA, the National Body of Accreditation of Test Laboratories, (registration number 0033). The accreditation certifies the technical skill of the staff, the use of adequate equipment, the impartiality of laboratory operators and of technical remarks issued by laboratory.

On 01st December 2011, Centrocot laboratory obtained accreditation as LAT Calibration Center (nr 226) for measurement of 'spectral reflectance factor' by ACCREDIA (Italian Accreditation Body) - Calibration Laboratories Department. Centrocot is thus authorized to issue LAT Calibration Certificates on spectrophotometers and reference materials for colorimetry.

Thank to one of the most advanced laboratory and to the skill reached in this sector, Centrocot has been notified EEC n.0624 to issue EU Type certificates according to Regulation (EU) 2016/425 abrogating the directive 89/686/EEC for protection garments and gloves against different kind of risk.

**STANDARD
100**

Centrocot, as a member of the OEKO-TEX® Association, is the only institute in Italy authorized to issue the OEKO-TEX® STANDARD 100 certificate; the certificate guarantees that the product doesn't contain human harmful substances above the limits of the Standard.

**LEATHER
STANDARD**

Centrocot, as a member of the OEKO-TEX® Association, is the only institute in Italy authorized to issue the OEKO-TEX® LEATHER STANDARD certificate; the certificate guarantees that the leather product doesn't contain human harmful substances above the limits of the Standard.

**ECO
PASSPORT**

Centrocot, as a member of the OEKO-TEX® Association, is the only institute in Italy authorized to issue the OEKO-TEX® ECO PASSPORT certificate; the certificate guarantees that chemical can be used in a sustainable textile production because it doesn't introduce in the process human and environmental harmful substances. The chemical OEKO-TEX® ECO PASSPORT certified indeed is tested and doesn't contain harmful substances itself above the limits of the Standard.

The laboratory has the necessary accreditation to carry out the necessary tests to obtain the Ecolabel, the ecological product label of European Union that in Italy is issued by Ecolabel and Ecoaudit Committee.

Centrocot is Member of the International Testing Association for Applied UV Protection and is the only institute in Italy authorized to issue the label UV Standard 801 which certifies the level of UV protection offered by a fabric.

REGULATIONS

The samples and the materials to be submitted to test have to be accompanied by a written request; non-written orders are not accepted; tests can be carried out only upon agreement with the Customer.

In order to simplify the request, the Customer can make use of the 'ORDER FORM', duly filled in and signed; on the order form the Customer can select whether he prefers to receive the offer or not. However, Centrocot is entitled to send the offer even if it is not required.

Instead of using the ORDER FORM, the Customer can apply to the Secretarial Staff who will inform him about the applicable contractual procedures which better comply with the request.

With regard to analysis of defect, accredited and not-accredited calibrations, voluntary certification and CE certification of Type, the contractual management always provides that the offer is drawn up and accepted.

It is Customer's responsibility to provide all the necessary information for the correct supply of the service: particular attention must be paid to the correct identification of the sample (fiber composition, item code, design code, variation code etc..).

Centrocot laboratory does not submit unchecked test results to the customer.

In case the customer needs to have a result's preview of finished tests, representing only a part of foreseen tests and, due to contractual clauses he cannot split results on different Test Reports, Centrocot can exceptionally issue Partial Test Reports including validated results of finished tests and "test in progress" by uncompleted tests. Once all tests are finished the complete Test Report will be issued, this will have the same identification number of the Partial Test Report, new data and will contain the sentence "completion of Partial Test Report with same number".

Centrocot commits to examine the complaints that may occur, to verify them and provide a clear and exhaustive written reply within and not over three month since the receiving of the complaint.

Upon request, it is possible to perform tests not included in the Catalogue according to national and international regulations, methods developed by the Laboratory or upon Customer's indication. The costs of these extra services are defined on the basis of specific offer.

The Test Reports cannot be partly reproduced without the written authorization of Centro Tessile Cotoniero e Abbigliamento S.p.A..

The Test Report refers only to the analysed samples and are exclusively property of the Customer.

Customer is aware that Centro Tessile Cotoniero e Abbigliamento S.p.A. is not responsible for the possible misuse by Customer of the results of the supplied service.

The copies of the Test Reports, the relevant registration documents and, if available, a sample for reference (counter-sample) are kept for 4 years with the exception of those Test Reports containing results used for the EU-Type Examination Certification that are kept together with the registration documents and, if available, a sample for reference (counter-sample) for 10 years. The copies of the EU-Type Examination Certificates and of the LAT Calibration Certificates along with the connected registration documents are kept for 10 years.

Residual textiles (after sampling for the requested test) will be destined for possible recovering or recycling, upon feasibility assessment and removal of any part identifying them. Shouldn't the recovery or recycling be possible, they will be destroyed. The Customer may require the return of the residual material selecting expressly such choice by filling in the appropriate section of the Test request form or of the Offer or through written request. In case of no indication of any choice, the samples will be destined to recovering/recycling or removal after expiry of 8 days from sending of the related Test Report by e-mail.

The Laboratory is accredited by ACCREDIA (accreditation number 0033). The not accredited Tests are indicated by symbol * in the Catalogue of Services and Tests.

Customers can consult the list of the accredited tests and download the ACCREDIA Accreditation Certificate directly from the website www.centrocot.it by clicking on ACCREDIA mark.

The accreditation states the technical qualification of the personnel, the use of proper equipments, the impartiality of the personnel entrusted with testing and, in wider terms, the accordance of the organization with the operational and technical requirements as provided in UNI CEI EN ISO/IEC 17025.

The agreements of mutual recognition and/or reciprocity taken by Accredia with similar bodies of other Countries assure the international recognition of the test results provided by accredited laboratories.

CONFIDENTIALITY

All information that will be brought to our knowledge for the development of the assignment will be treated as confidential and therefore Centro Tessile Cotoniero e Abbigliamento S.p.A. commits to maintain this confidence and not to disclose any information to third parties without Your prior consent and not to use materials or documentation received by You if not for the specific purposes of the assignment.

TERMS OF SALE

INVOICING

Payment of test and services is due through bank transfer 30 days from invoice date end of month. Customer requesting Centrocot's services for the first time must submit their company data and bank references filling the form that can be downloaded from the website www.centrocot.it.

Foreign Customers shall be requested to pay in advance for the performance of Centrocot tests and services.

If any default of payment for invoices previously issued should occur, Centrocot is authorized to suspend all activities till the complete settlement of payments.

SUBSCRIPTIONS

Upon request, Customer has the opportunity to subscribe subscriptions at special rates.

APPLICABLE LAW AND JURISDICTION

Services are subject to Italian law. For any dispute that might arise in regard to the present Agreement, the court of Busto Arsizio shall have exclusive jurisdiction with exclusion of all other alternative or competing courts.

PHYSICAL-MECHANICAL TESTS

General

Code	Description	Methods
* 10155	Visual evaluation	
* 10151	Check of the sample and preliminary analysis	
* 14000	Ready-made garments: check of aspect and exterior features	
* 10153	Grain check	Method supplied by customer
* 10161	Summary table of analytical data	

Fibres

Code	Description	Methods
* 13129	Fibres. Measure of length by of single fibre	ISO 6989:1981 only method A (with a ruler on polished glass plate)
* 12130	Fibres. Measure of single fibres	UNI 5751:1990 (except paragraphs 4.2 and 7.2)
* 12131	Fibres.Length of fibre tuft	MIP 003:2008 Rev.1
* 12140	Fibres. Linear density	UNI EN ISO 1973:2021 only gravimetric method
* 12134	Fibres man-made. Crimp frequency	ASTM D 3937-12 (2018) only option 1 (method on single fiber)
* 12149	Fibres. Linear density (yarn count). Gravimetric method	ASTM D 1577-07 (2018) only option A (fiber bundle weighing)
* 12150	Fibres. Length and length distribution of cotton fibres (Comb sorter method)	UNI 10170:1994
* 12220	Cotton fibres. Measurement with HVI Spinlab instruments	ASTM D5867-12(2020)
* 12222	Fibres. Number of neps	ASTM D5866-12(2020)
* 12245	Cotton fibres. Impurity content.Trash Analyser	MIP 025:2008 Rev.1
* 12250	Fibres. Retraction in water	ASTM D 2102-02 (2018)

Threads and yarns

General

Code	Description	Methods
* 13121	Threads and yarns. Length and weight of yarn winded on a cone	MIP 020:2008 Rev.1
* 13400	Threads and yarns. Preparation of tubolar knitted fabric	MIP 015:2008 Rev.1
* 13300	Fibres. Length and length distribution of cotton fibres (Comb sorter method)	UNI 10170:1994
* 13182	Threads. Entanglement degree. Manual Method	ASTM D4724/D4724M-21
* 13181	Texturized thread. Crimping degree	BISFA 2007 Textured Filament Yarns Cap. 10
* 13290	Threads and yarns. Coefficient of friction	ASTM D3108/D3108M-13(2020)
* 13291	Threads and yarns. Coefficient of friction	MIP 024:2008 Rev.1
* 13130	Threads. Number of filaments	MIP 002:2008 Rev.1
* 13391	Yarns. Type of spinning	MIP 011:2008 Rev.1
* 13310	Yarns. Appearance. Black table	ASTM D2255/D2255M-09(2020)
* 13320	Yarns. Unevenness of textile strands using capacitance testing equipment (Uster Tester 3)	ASTM D1425/D1425M-14(2020)

* 13321	Yarn package - Tests including: Linear density (yarn count), tensile strenght and elongation, yarns twist, unevenness using capacitance testing equipment (Uster Tester 3), appearance (black table), coefficient of friction	UNI EN ISO 2060:1997 only option 1 (test in normal atmosphere) UNI EN ISO 2062:2010 (except methods C and D) ISO 17202:2002 ASTM D1425/D1425M-14(2020) ASTM D2255/D2255M-09(2020) ASTM D3108/D3108M-13(2020)

Threads and yarns

Linear density (mass per unit length)

Code	Description	Methods
13120	Threads and yarns. Linear density (yarn count)	UNI EN ISO 2060:1997 only option 1 (test in normal atmosphere)
* 13117	Threads and yarns. Linear density (yarn count)	ASTM D 1907-07/D1907M-12 (2018) only option 1 (test in normal atmosphere)
* 13119	Texturized yarns. Linear density (yarn count)	BISFA 2007 Textured Filament Yarns Cap. 7
* 13122	Elastomeric threads and yarns. Linear density (yarn count)	BISFA 2015 Bare Elastan Cap. 5
* 13118	Glass fibre threads. Linear density (yarn count)	BISFA 1977 Textile Glass Filament Yarns Cap.F
* 13126	Reinforcement yarns. Linear density	ISO 1889:2009 (except Par. 5.2 and 8.3)

Threads and yarns

Tensile strenght

Code	Description	Methods
13180	Threads and yarns. Yarns from packages. Tensile strenght and elongation	UNI EN ISO 2062:2010 (except methods C and D)
* 13183	Elastomeric threads and yarns. Tensile strength and elongation	BISFA 2015 Bare Elastan Cap. 6
* 13179	Glass fibre threads. Tensile strength	BISFA 1977 Textile Glass Filament Yarns Cap.G
* 13178	Textile glass filament threads for the reinforcement of plastic materials. Tensile strength	UNI 9411:1989
* 13125	Textured threads. Tensile strength	BISFA 2007 Textured Filament Yarns Cap. 8
* 13177	Carbon fibre. Tensile properties of resin-impregnated yarn	UNI EN ISO 10618:2005 (except Par. 7.3, 10.2 and 10.3)

Threads and yarns

Twist

Code	Description	Methods
* 13140	Textiles. Twist in single yarns	UNI 9069:1988
* 13141	Textiles. Twist in single yarns	ISO 17202:2002
* 13146	Threads and Yarns Twist. Indirect method for single threads and yarns	ASTM D1422/D1422M-13(2020)
* 13142	Textiles. Threads and Yarns Twist. Direct method	UNI EN ISO 2061:2015
* 13143	Texturized yarns. Twist	BISFA 2007 Textured Filament Yarns Cap. 5
* 13144	Glass fibre threads. Twist	BISFA 1977 Textile Glass Filament Yarns Cap.E
* 13380	Yarns. Twist stability/crimping	MIP 004:2008 Rev.1

FABRICS AND READY-MADE GARMENTS – CONSTRUCTION TESTS

Dimensions and weights

Code	Description	Methods
* 14107	Ready-made garments. Measurements and weight	MIP 019:2008 Rev.1
* 14114	Fabrics. Thickness	UNI EN ISO 5084:1998 (except points A1 and A2 of appendix)
14104	Fabrics. Width of fabrics	ASTM D 3774-2018
14101	Fabrics. Width of fabrics	ISO 22198:2006 Par. 8.3
14115	Fabrics. Width of fabrics	UNI EN 1773:1998 Par. 8.3
* 14099	Reinforcement products. Woven fabrics. Determination of width	ISO 5025:2017 Par. 7.2
* 14100	Reinforcement products. Woven fabrics. Determination of length	ISO 5025:2017 Par. 7.3
14111	Fabrics. Mass per unit area and mass per unit length	UNI 5114:1982
14123	Fabrics. Mass per unit area. Small sample method	UNI EN 12127:1999
14125	Fabrics. Mass per unit area and mass per unit length	ISO 3801:1977 ASTM D3776/D3776-20

* 14138	Woven fabrics. Number of threads per unit length	ASTM D 3775-17

FABRICS AND READY-MADE GARMENTS – PERFORMANCE TESTS

General

Code	Description	Methods
* 14480	Fabrics. Recovery from creasing	UNI EN 22313:1993
* 14146	Fabrics. Recovery from creasing. Horizontally folded specimen	ISO 2313-1:2021
* 14720	Fabrics. Printing of the cloth surface	MIP 031:2008 Rev.1
* 14335	Fabrics, Nonwoven fabrics. Flexural rigidity. Bending length test	UNI 10138:1992 only method 5.1 (manual equipment)
* 14271	Knitted fabrics. Index of damage by needle penetration in existing seams	MIP 036:2008 Rev.1
* 14272	Knitted fabrics. Damage by needle penetration in seams	MIP 036:2008 Rev.1
* 14273	Woven fabrics. Damage by needle penetration in seams	MIP 036:2008 Rev.1
* 14274	Woven fabrics. Index of damage by needle penetration in existing seams	MIP 036:2008 Rev.1
* 14098	Textile glass. Woven Fabric. Thickness	ISO 4603:1993 + Amd 1-2010 (only pressure 2 kPa)

Tensile strenght

Code	Description	Methods
14220	Fabrics. Tensile strenght and elongation. Strip method	UNI EN ISO 13934-1:2013
* 14217	Fabrics. Tensile strenght and elongation. Strip method	ASTM D 5035-11 (2019)
* 14234	Textiles, Leather, Accessories. Tensile strength test	Method required by customer
14230	Fabrics. Tensile strenght. Grab method	UNI EN ISO 13934-2:2014
* 14231	Fabrics. Tensile strenght. Grab method	ASTM D 5034-21 (except Par. 9.3)
14266	Fabrics. Seam tensile strength. Strip method	UNI EN ISO 13935-1:2014
14267	Textiles. Seam tensile properties. Grab method	UNI EN ISO 13935-2:2014

Tensile strenght of yarns from fabrics

Code	Description	Methods
14130	Threads and yarns. Yarns from packages. Tensile strenght and elongation	UNI EN ISO 2062:2010 (except methods C and D)
* 14139	Textured yarns. Tensile strength and elongation	BISFA 2007 Textured Filament Yarns Cap. 8
* 14131	Elastomeric threads and yarns. Tensile strength and elongation	BISFA 2015 Bare Elastan Cap. 6
* 14147	Glass fibre threads. Tensile strenght and elongation	BISFA 1977 Textile Glass Filament Yarns Cap.G
* 14148	Terry fabrics. Test method for the determination of the resistance to pile loop extraction	UNI EN 15598:2008

Tearing strenght

Code	Description	Methods
14240	Fabrics. Tearing strength. Tear specimen	UNI EN ISO 13937-2:2002 + EC 1 - 2004
14246	Fabrics. Tearing strength. Tear specimen	ASTM D 2261-13 (2017)

China GB 31701. Safety for infants and children textile products

In order to assist those entrepreneurs exporting into Chinese market, Centrocot presents its own offer to perform tests intended to ensure the compliance with the compulsory Chinese Standard GB 31701 - "Safety Technical Code for Infants and Children Textile Products". The GB 31701-2015 Standard came into force on 1st June 2016 and establishes the safety requirements of textile products for infants and children up to 14 years of age. The articles manufactured before 1st June 2016, in compliance with the requirements of that period, can be sold in China not later than 31st May 2018.

The Standard specifies that the products have to satisfy not only safety requirements but also have to comply with the compulsory Standard GB 18401, whose tests are described in the specific Section of the Catalogue.

In case of padding, it is required to perform the tests provided by GB/T 17685 Down and Feathers.

CHINA. Other mandatory national standards (GB 28480, GB 20400, GB 25038, GB 25036)

Besides the best-known GB 18401, in China there are other mandatory national standards issued in order to protect consumers' health. Centrocot presents its offer for the performance to verify compliance with key regulations regarding jewelry (also in precious metals) and metal accessories; items and components in leather; footwear for adults and children.

CHINA. Other tests performed according to Chinese methods

Complementing the tests included in standard GB18401, Centrocot can carry out the main tests for the evaluation of the general, performance and ecological characteristics of the textiles according to the modalities provided by Chinese standards. Among these, fiber composition is of great interest, as it is one of the compulsory requirements often subjected to controls. Hereunder, a selection of the main tests.

REACh. SVCH and Candidate List. Tests to verify products and accessories

Centrocot presents its offer for the determination of the SVHC "Substances of Very High Concern", included in the "Candidate List" updated on 17th December 2014, contextually to the new European regulation REACh "Registration, Evaluation, Authorisation and Restriction of Chemicals", entered into force on June the 1st, 2007.

The chemical substances in the SVHC list have been evaluated and classified as carcinogenic of category 1 and 2, mutagenic and toxic to reproduction, persistent, bioaccumulative and toxic (PBT), very persistent and very bioaccumulative (vPvB).

Some of these substances have a real use in the textile sector, while other no.

However Centrocot has considered to offer a complete array of tests, whose selection will be made regarding to the different type of articles and security level the clients ask.

Most of the analytical methods for the determination of the substances have been implemented by the Research Laboratory staff of Centrocot.

BIOCOMPATIBILITY TESTS

Tests

Code	Description	Methods
* 90060	Finished products or raw materials.Basic sensitisation	Quantitative evaluation of the sensitisation risk of finished products and raw materials trough the expression of co-stimulatory molecules on monocytes/macrophages
* 90061	Advanced sensitisation	Quantitative evaluation of the sensitisation risk of finished products and raw materials trough the expression of cell surface markers on dendritic cells
* 90062	Finished products or raw materials.Ex-vivo sensitisation	Reactivity evaluation from a serum pool of human subjects allergic to latex, shrimps, gluten or preservatives o others specific allergens versus finished products and raw material
* 90063	Finished products or raw materials.Sensitation elisa test	Reactivity quantification of finished products and raw materials using antibodies to specific aptens (li.e. atex, shrimps, gluten, preservatives)
* 90064	Finished products or raw materials.Local lymph node assay	Alternative in vivo test used for testing of medical devices and raw materials, according to the OECD TG 429 and in compliace with UNI/EN/ISO 10993-10 + The sample is tested at three concentrations. It is recommded for substances at risk
* 90065	Finished products or raw materials.Reduced local lymph node assay	Alternative in vivo test used for testing of medical devices and raw materials, according to the test ESAC statement of 27th april 2007 and OECD 429 and in compliance with UNI/EN/ISO 10993-10. The sample is tested at one concentration. It is recommded for substances not at risk
* 90066	Cytokine assay on 3D epidermis	Assay of cytokines involved in the allergic reaction cascade, even aimed to discriminate between pro-sensitising and pro-inflammatory effect. + Price for one cytokine test
* 90067	Cytokine assay on human keratinocytes or on monocytes/macrophages	Assay of cytokines involved in the allergic reaction cascade, even aimed to discriminate between pro-sensitising and pro-inflammatory effect. + Price for one cytokine test
* 90068	Cytokine assay on dendritic cells	Assay of cytokines involved in the allergic reaction cascade, even aimed to discriminate between pro-sensitising and pro-inflammatory effect. + Price for one cytokine test

* 90069	Finished products or raw materials. Sensitisation inhibition on monocytes/ macrophages	Inhibition of the sensitisation effect induced by a specific apten (i.e. nickel) by finished products or raw materials in different concentration through the quantification of the expression of co-stimulatory molecules
* 90072	Finished products or raw materials. Cytotoxicity with pretreatment	Determination of the EC50 in skin-derived cell monolayers (fibroblasts or keratinocytes lines) for the evaluation of biocompatibility of medical devices according to UNI/EN /ISO10993-5, and for the estimation of the acute toxicity of raw materials and finished products
* 90074	Finished products or raw materials. Skin irritation on 3D epidermidis	Estimation of the skin irritation potential using a two time point MTT assay as cell viability endpoint in a human reconstituted epidermis; irritation assessment against a negative control and a known irritant (SLS) as positive control using the ET50 value
* 90075	Finished products or raw materials. Eye irritation/cytotoxicity	Estimation of the eye irritation potential by IC50 determination (NRU cell viability test) on cultured fibroblasts. The product is tested at various dilutions and the IC50 is assessed against a negative control and a known eye irritant (SLS) as positive control
* 90076	Finished products or raw materials. Phototoxicity	3T3/NRU test according to EU normative (Annex V - B.41, Council Directive 67/548/EEC) and OECD Test Guideline 432. The phototoxicity of the substance is assessed in cultured 3T3 fibroblasts by measuring the cell viability after exposure to the product in the presence or not of UVA and compared against a known phototoxic substance (chlorpromazine). Especially suitable to test raw materials designed for topical use under UV exposure, sun products, fragrances, day-care cosmetic products
* 90077	Finished products or raw materials. Ames test	Mutagenesis test for raw materials/finished products according to the Ames protocol (Annex V - B.13-14 CD 67/548/EEC and OECD Test Guideline 471) on 5 strains of Salmonella, with and without S9 metabolic activation
* 90078	Finished products or raw materials. Ecotoxicity test on crustacean Preliminary	Preliminary ecotoxicity test on raw materials/finished products/water according to OECD 202 on Daphnia magna

* 90079	Finished products or raw materials. Ecotoxicity test on crustacean "range finding test"	Complete ecotoxicity test on raw materials/finished products/water according to OECD 202 on Daphnia magna, necessary to better determine EC50 when the sample shows ecotoxicity effect on the preliminary test
* 90082	Finished products or raw materials. Skin irritation on 3D epidermis according to OECD 439	Estimation of the skin irritation potential using MTT assay at one time point in a human reconstituted epidermis; comparison with a negative control and a known irritant (SLS) as positive control according to validated ECVAM protocols
* 90083	Finished products or raw materials. Occlusive epicutaneous test (Patch test)	Skin compatibility evaluation (irritation). Single Patch test (48 h)
